**Our Vision.
Your Future.**

The Telekom Austria Network.

You need visions to be able to actively shape the future.

Yesterday, our vision was to break through the barriers of pure fixed line voice telephony. Today, this has become reality and Telekom Austria's multi-service broadband network is an example of our leading edge technology.

Today we also have a vision: To make the communications of tomorrow even faster, safer, more diverse and convenient.

Look forward to an exciting future with new technologies that bring people together via the reliable network of Telekom Austria.
